DATE Oct 10, 2002

When no flooding occurs, include miscellaneous river conditions, such as significant rises, record low stages, ice conditions, snow cover, droughts, and hydrologic products issued (WSOM E-41).

☒ No flood stages were reached in this HSA for the month above.

September was slightly drier than normal over much of the HSA. High pressure aloft and at the surface dominated for much of the month. Most of the rain came in the early and middle of September. Moisture from the remnants of tropical Storm Fay from the 7th and 8th produced rainfall amounts of 1 to 3 inches, along and east of a Junction to Menard to Brady line. Thunderstorms were more widespread across the region on the 9th, producing 1/4 to 1 inch of rain. Cold fronts on the 14th and 19th produced widespread showers and thunderstorms of 1/2 to 2 inches.

San Angelo received a total of 1.64 inches of rain for the month, 1.31 inches below normal. For the year so far, San Angelo has received 8.46 inches of rain, which is 7.84 inches below normal. For September, Abilene received 2.05 inches of rainfall, 0.86 inches below normal. For the year so far, Abilene received 21.31 inches of rain, which is 2.39 inches above normal.
